

DM220008

## Set of materials samples

Samples to study the property of different materials.

### School level

Junior and senior high schools.

### Technical features

9 samples of different materials:  
aluminium, wood, expanded PVC,  
steel, PET, PVC rigidified,  
copper, rubber, polystyrene  
Unit dimensions: 65x30mm  
Total weight: 100g.

### Product advantages

- Quickly observe mechanical properties of different materials.
- Wide range of different materials.
- Samples included in the material study kit.

### Examples of experiments

- Volumic mass.
- Vickers hardness test.
- Rigidity coefficient of a spring.

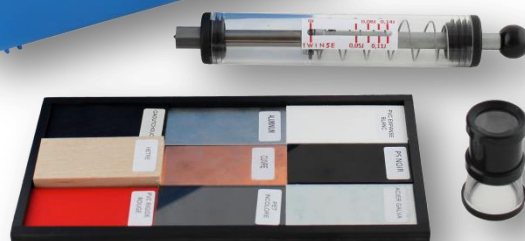

### Associated products

Material study kit - **DM220007**

Aplanatic magnifying glass - **DO103010**

*Material study kit*

## EXPERIMENTS

*Use of bradawl on wood sample and observation with aplanatic magnifying glass*
