

DE102007

## 7 decades inductances box

Device to study RLC circuits.

### School level

Senior high school.

### Technical features

Metallic white box with black serigraphy  
 Rotary switches with 10 positions  
 Security sockets  $\varnothing 4\text{mm}$   
 6 rubber feet  
 7 decades resistance box:  
 Decades range: 1H to 1  $\mu\text{H}$   
 Precision: 5%  
 Intensity: 40mA to 350mA  
 Max. power supply: 50V  
 Dimensions: 500 x 82 x 78 mm  
 Weight: 1.600 kg  
 Packaging: individual box

### Product advantages

- Metallic box **resistant and stable**.
- **Customization available**.

### Examples of experiments

- Study of RLC circuits.

### Associated products

4 decades resistances box – **DE102004**  
 5 decades resistances box – **DE102003**  
 6 decades resistances box – **DE102002**  
 7 decades resistances box – **DE102001**
